

4Band EQ

1. Volume
2. Bass
3. Middle
4. Treble
5. Presence
6. Battery check
7. Battery check LED
8. Battery box

— 1 —

1. Volume Knob

The VOLUME controls the output volume. Turned fully counter-clockwise it is completely OFF. Turned fully clockwise it is LOUD!

2. Bass EQ TONE CONTROL (for bass tones)

3. Middle EQ TONE CONTROL (for middle tones)

4. Treble EQ TONE CONTROL (for high tones)

5. Presence EQ TONE CONTROL (for very high tones)

The BASS, MIDDLE, TREBLE, and PRESENCE controls are a 4-band equalizer for controlling tone. The BASS, TREBLE and PRESENCE tone controls are normal boost / cut shelving controls. The MIDDLE (midrange) tone control is a normal boost / cut tone filter. The center detent on these tone controls yields a flat tone response. "+12" boosts the tone; "-12" cuts the tone.

6. Battery check

7. Battery check LED

The LED will light when the battery has lost power. Replace the battery when this light is on.

This LED light will flash when a cable is connected to the output jack of the pickup system. This shows the battery is good.

8. Battery

A 9-volt battery powers the EQ-7545R preamp. Before connecting the instrument to an amplifier or mixer please check that a fully charged 9-volt battery is connected.

Solution

- 1) When there is no sound or sound is stopped,
 - Check guitar cable, amp or Mixer
 - Check if there is batter or not. When it happens noise or distortion, please exchange battery.
 - Check if the pickup and battery connector is connected correctly or not.
 - Check if out put jack is connected correctly.
- 2) When there is hum-noise,
 - Check the pickup is connected well or not.
 - Check if the connectors are connected to correct position well or not.
- 3) Some causes of the balance problem
 - When the bottom of saddle or the groove of saddle is not flat.
 - When saddle is installed to the groove of saddle loosely.
 - When the connection is not good between the bottom of saddle and the groove of saddle.
 - When Saddle is very short
 - When there is grounds on the groove of saddle.
 - When Saddle is declined toward front or back.
 - When the top of guitar is bended.
 - When the pickup is installed to only a part of the groove of saddle.
